## WORDS OF WISDOM

### FROM OUR FOUNDER

**SAHIL TANEJA**  
*(Founder)*

Without passion, you don't have any energy and without energy, you simply have nothing. I firmly believe that you don't need to be a genius to be successful, you just need to have a dream and start working on it. Being the Founder of MTC, when I look back at times when I was in my 1st year, I always was keen in learning things about technology and evolution. back then, I had to strive to focus and learn things apart from my education part, I had to dig a lot to get info regarding the latest updates on the innovations going in these tech giants. Keeping all this in mind, I founded MTC so that each and very student gets the exposure of the ice-breaking technology out there and also the opportunity to nurture themselves for the competition they are going to face further. MTC basically focuses on imparting quality learning on all about Microsoft to the students and also shape them for their future by their all-round development. MTC will always keep you updated with the innovation going on a frequent basis. Surely, there will be a day when we can imagine ourselves in the top notch of the country and be proud of ourselves. And for that, MTC is surely a humble beginning...

## FROM OUR PRESIDENT

**MANIK GARG**  
(PRESIDENT)

“Microsoft Technical Community” as the name suggest is a community which will work on the technical side of students. Everyday students will be doing Brainstorming and learning new things. This will make them aware of every new technology that comes in the market which is most of the companies are looking for and which is the necessary to be an entrepreneur. MTC will brush up the technical knowledge of the students making them more capable in what they do and what they want to do.

## AND OUR MISSION

**A community, a student chapter based on the ideology "Your Potential our Passion" which connotes enhancing one's abilities while gaining experience in various fields of expertise and turning one into a real professional.**

**Our mission: Microsoft Technical Community aims at creating a pro out of an amateur. We enhance student's skills, give them opportunities and platform to start their professional life.**

## AND OUR ROLE

The journey of Microsoft Technical Community was set off to become a student chapter which focuses on providing students with "real technical knowledge". A student chapter was needed which could stand tall and apart from all other chapters which run behind the "profits".

MTC was setup to end the infrequent technical orientations and improve the quality of esoteric knowledge. MTC also promise to give the practical applications of latest techniques and concepts. The basic values on which Microsoft Technical Community is based are "*Professionalism, Punctuality, Perfection and Consistency*".

Any organization or anyone who want to be successful needs professionalism and punctuality to meet its dreams. And the most important things- Perfection and Consistency because this is what is takes to be in the spotlight of any room.

With this P2PC principle we aim to share our knowledge to share what we have got. The members of MTC are not seeking any credits for what they do they just want to spread and share what they know cause everyone at MTC is a firm believer that knowledge is increased by Sharing.

The Moto of MTC is "From intelligence to ideas and ideas to innovation".

With this I believe that MTC is going in right direction to let it's members think innovate and rethink so that it could become the most wanted community in the UPES to be a part of.

- 1) A session on LinkedIn Rock your profile so that students will be able to make up their linked in profile nicely which will help them in many ways.**
- 2) A session on various Microsoft apps that are available on various platforms for professional as well as personal work.**
- 3) Office 365 setup and training to properly and efficiently use its apps.**
- 4) Inter college hackathon with support from other MTC's in Dehradun.**

## VIEWS FROM OUR TEAM

**SHIVAM TALWAR**  
(Design Head)

MTC is a great opportunity for students to learn and expertise in various modern-day technicalities.

I am very happy to be a part of this community and I hope it will prosper more and more in future attracting a large number of students.

Speaking literally what is MTC? Microsoft technical community is a new student chapter in UPES. But for me it means more, it's a new beginning, a new chapter of my life giving me opportunities and helping me learn. I am sure that I would see MTC Metamorphose to Conqueror when I leave this university.  
MTC-A tribute to knowledge..

**ARYAN BANYAL**  
(Editorial Head)

**SHREYA PANDEY**  
(Public Relations Head)

As a PR Head, I want to see MTC to be the most known student chapter of UPES. I wish to take MTC to new heights by putting in my best efforts and team collaboration of the community. For future perspective, I want to see MTC as a respected, popular and established chapter. To have a well-established, dedicated and proper functioning PR Committee is my dream and goal that hopefully would be achieved in near future.

MTC is a new student chapter which has now been initiated in UPES. It will help students to enhance their technical knowledge by tech-talks and workshops on latest technologies. The technical knowledge of students will be polished and they will become a perfectionist in a field they like and this is what it takes to be a real technical expert.

**KRITIKA SHARMA**  
(Technical Head)

**ABINASH PRASAD BORAH**  
(Senior Advisor)

First of all, I am delighted to be a part of Microsoft technical community and can proudly say that this community will provide a platform to all the aspirants who want to learn about technology and evolve themselves into responsible and humble being.

**ADARSH KUMAR**  
(VFX Head)

Being the vfx head of MTC is a really a proud thing for me and I will make sure that MTC will touch the sky heights with the support of my sincere and honest work.

MTC gave me chance to improve my photography and leadership skills and it will a thing of great honour to see MTC being the biggest knowledge hotspot of INDIA.

**MANI KARTIK**  
(Photography Head)
